Talent Acquisition Team

Dear Hiring Team,

I am excited to express my strong interest in the Software Engineer position at your company, tailored for my recent B.E/B-Tech graduates. This company's vision of shaping the future of enterprise software perfectly aligns with my passion for using technology to simplify and elevate how people work.

As a recent graduate with a Bachelor's degree in Electronics and Communication from Dr. B.C. Roy Engineering College, My academic journey, marked by an impressive 8.4 CGPA, underscores my dedication to excellence in my field.

My experience as an Associate Software Engineer at Nagarro Private Limited has equipped me with valuable automation testing skills. I have adeptly conducted API testing using Selenium in Java, web app testing with Selenium and Playwright, and Android app testing with Java and Appium. Furthermore, I am proficient in generating informative reports through tools like Allure reporting and TestNG. My ability to excel in dynamic environments and collaborate seamlessly with cross-functional teams has contributed to our automation testing initiatives. I have also worked as a manual tester where my work is to create comprehensive, and well-structured test plans and test cases and track quality assurance metrics, like defect densities and open defect counts.

During my internship with Wipro Limited, I meticulously crafted a Page Object Model (POM) framework using Java, Selenium, and TestNG. This framework incorporated reporting and parallel execution capabilities, further honing my test automation and framework development skills.

Beyond my technical prowess, I possess a rich background in volleyball, having competed at the sub-divisional level during my school and college years. This experience has instilled in me the values of teamwork, discipline, and unwavering determination, which I believe are transferrable qualities that can enrich any professional setting.

With expertise in Python, Java, automation testing tools, and strong problem-solving abilities, I am confident that I am a compelling candidate for the Software Engineer role at this company. I am eager to contribute my skills and knowledge to help to attain its objectives and surpass expectations.

I am enthusiastic about the opportunity to explore how my qualifications align with its requirements. Please feel free to reach out to me at your convenience.

Sincerely,

Abhishek Kumar
